# Disclosures

---

There are no conflicts of interest or financial disclosures to be reported at this time.

# National Survey on Drug Use and Health (NSDUH)

---

- In 2015, 9.7 million people aged 12 or older reported driving under the influence of illicit drugs over the past year.
- The age group 26+ had the highest rate of driving under the influence of illicit drugs.

# City of Houston

- United States Census, 2015
  - 2,296,224 million people live in Houston.
  - Most populous city in Texas.
  - Fourth most populous city in the United States.

# Objective

---

- Provide important regional information to better understand the demographic profile of drug-impaired drivers in Houston, Texas.

# Case Selection

588

cases

- Total number of toxicology-related cases analyzed by HFSC in 2015.

457

cases

- Exclusion of cases that did not have blood samples analyzed.

425

cases

- Exclusion of cases that are not driving-related.

# Data Collection

The background of the slide is a dark blue gradient. In the top right corner, there is a large, detailed fingerprint. On the left side, there are faint, handwritten notes in a cursive script, some of which are partially obscured by the fingerprint.

# Prevalence of 20 Most Common Drugs in Houston

Drug	[Mean] (ng/mL)	[Median] (ng/mL)	[Range] (ng/mL)	Number of Positive Cases
Δ9-THC	3.8	2.9	0.5-17	104
11-nor-9-Carboxy-THC	41	29	5.2-200	143
11-Hydroxy-THC	2.4	1.8	0.5-7.2	42
Alprazolam	67	49	5.6-450	114
α-Hydroxyalprazolam	8.0	6.5	5.2-14	4
Hydrocodone	65	45	6.4-311	53
Cocaine	49	38	15-120	11
Benzoyllecgonine	967	327	15-5000	50
Ecgonine Methyl Ester	50	51	15-96	10
Cocaethylene	18	15	15-25	8
Phencyclidine	44	39	7.3-92	43
Carisoprodol	4.5	4.6	0.5-17	25
Meprobamate	21	17	3.0-55	25
Amphetamine	44	30	6.4-180	21
Clonazepam	21	13	2.5-48	19
7-Aminoclonazepam	27	19	6.7-69	19
Methamphetamine	71	26	10-500	18
Hydromorphone	2.6	2.0	1.0-7.7	16
Diazepam	195	105	21-520	10
Nordiazepam	204	92	23-950	13
Codeine	102	68	5.6-290	13
Morphine	34	16	5-160	13

# Sex Demographic Analysis

	Drugs	% (N) of Positives	Mean Age
Males (N=336)	Cannabinoids	37% (123)	33
	Alprazolam	25% (84)	
	Cocaine	12% (41)	
Females (N=89)	Alprazolam	34% (30)	35
	Cannabinoids	23% (20)	
	Hydrocodone	16% (14)	

# Race/Ethnicity

## Demographic Analysis

	Drugs	% (N) of Positives	Mean Age
White (N=256)	Cannabinoids	33% (85)	33
	Alprazolam	28% (72)	
	Hydrocodone	13% (34)	
Black (N=129)	Cannabinoids	35% (45)	35
	Phencyclidine	28% (36)	
	Alprazolam	19% (25)	
Asian (N=15)	Alprazolam	40% (6)	31
	Cocaine	20% (3)	
	Cannabinoids/PCP/Amphet	7% (1)	
Hispanic (N=12)	Cannabinoids	33% (4)	27
	Alprazolam	25% (3)	
	Cocaine	8% (1)	

# Age Demographic Analysis

	Drugs	% (N) of Positives	Mean Age
Aged 17-25 (N=115)	Cannabinoids	50% (57)	22
	Alprazolam	41% (47)	
	Cocaine	7% (8)	
Aged 26-40 (N=217)	Cannabinoids	36% (79)	32
	Alprazolam	24% (51)	
	Phencyclidine	17% (36)	
Aged 41-60 (N=81)	Alprazolam	19% (15)	49
	Hydrocodone	17% (14)	
	Cocaine	11% (9)	
Aged 61+ (N=10)	Cannabinoids	30% (3)	66
	Cocaine/Hydrocodone	20% (2)	
	Alpraz/Cariso/Clonaz/Diaz	10% (1)	

# Demographics within Drug Groups

Drug Group (N)	Sex, %		Race/Ethnicity, %				Age, year, Mean (Range)	
	M	F	W	B	A	H		
Cannabinoids (143)	86	14	59	31	1	3	29	17-64)
Alprazolam (114)	74	26	63	22	5	3	30	17-64)
Hydrocodone (53)	74	26	64	36	0	0	38	22-64)
Cocaine (52)	79	21	62	29	6	2	33	20-64)
Phencyclidine (43)	70	30	14	84	2	0	35	22-49)
Carisoprodol (25)	68	32	64	36	0	0	40	27-63)

# National and International Drug Prevalence

---

- **Logan et al., 2013**

- Surveyed 96 forensic laboratories across United States to determine the most prevalent drugs amongst drug impaired drivers.

- **Legrand et al., 2013**

- Determined the prevalence of drugs in driving-related cases in Belgium, Denmark, Finland, Italy, Lithuania and the Netherlands.

# National Prevalence

Drug(s)	Number of Positive Cases
Cannabinoids (3)	143
Alprazolam	114
Hydrocodone	53
Cocaine (4)	52
Phencyclidine	43
Carisoprodol/Meprobamate	25
Amphetamine	21
Clonazepam/7-Aminoclonazepam	20
Methamphetamine	18
Hydromorphone	16
Diazepam/Nordiazepam	14
Codeine	13
Morphine	13

Prevalence of top 20 drugs in Houston in 2015

Logan et al., 2013 →

MDEA	0

The background of the slide features a dark blue gradient. On the right side, there is a large, detailed fingerprint. On the left side, there are faint, handwritten notes in a cursive script, some of which appear to be medical or legal in nature. The word 'Conclusions' is written in a large, white, sans-serif font in the upper center of the slide.

# Conclusions

- In 2015, cannabinoids were the most prevalent drugs detected in driving-related cases in Houston (34%, N=143).
- Alprazolam was the most prevalent drug for female (32%, N=30), Asian (15%, N=6) and age 41-60 (19%, N= 15) demographics.

# Conclusions

- Phencyclidine was the fifth most prevalent drug detected in Houston in 2015 (10%, N=43).
- National Drug Intelligence Center, 2004
  - Houston is a known PCP hot spot
  - Other locations include San Francisco, Baltimore, Washington D.C. and Philadelphia

# Conclusions

- Predominant Suspect Demographics:
  - Male (79%, N=336)
  - White (60%, 256)
  - 26-40 years old (mean 33 years)
- List of most prevalent drugs in Houston shows similarities to other laboratories across the United States as well as across Europe.
